# BROKERS' LAW

We advise real estate brokers and their customers on the preparation and drafting of contracts (consultancy contracts, exclusive and non-exclusive brokerage or agency agreements, etc.) and support our clients during contractual negotiations. We assist with the assertion of claims for commission and with the defence against unjustified claims. Specialist expertise in the law applicable to real estate brokers and many years of experience advising in this area ensure that our team can easily assist with all matters:

- We draft and negotiate brokerage and agency agreements, and provide our clients with support until the conclusion of these agreements.
- Our experts assist real estate brokers in the enforcement of commission claims and real estate customers in the defence against unjustified claims. We advise on questions of liability with respect to brokerage agreements, too. Our multidisciplinary, sector approach allows us to draw upon the expertise of specialists from our whole real estate law team.
- We represent our clients both in and out of court in the assertion of claims.
